

About

- Many life sciences companies have tried and failed, as it's highly challenging to track glucose levels accurately without piercing the skin.
- People envisioned wearable devices, like smartwatches, being used to monitor important vitals, such as oxygen levels, heart rate and blood glucose.
- With Holy Grail App will allow users to view their glucose level anytime at a glance, you also review how your glucose changes over few hours or days to see trends. Seeing glucose changes in real-time can help you make more informed decisions throughout the day about how to balance your food, physical activity and medicine

PROBLEM

- Users cannot manage their daily glucose each day.
- Users don't have knowledge of how much sugar / calories they take each day
- With Holy Grail product you get your glucose level without painful blood tests, no more lancets, no more strips and you don't need to check your calorie intake manually
- Currently users suffer from inconsistent sugar/calorie intake which will lead to serious diseases in future
- Users take excessive of sugar/calorie to whereby too much of everything lead to health complications.

More On About The App

What's the Target Audiences

App is for persons with age of 16+ of age, anyone who wants to know if their daily intake on food how many sugar/glucose it has and to improve their eating habits along with monitoring their glucose levels & want to live/eat healthy food, lastly anyone often have low or high blood glucose

What's Unique With The App

The App doesn't only help you to know your levels of intakes in glucose but also gives you resources in how to make right choices for living healthy or balanced lifestyle for your health, it is interactive whereby you share thoughts with other users and see their activities and encourage to be consistent in your daily intake or minimizing unhealthy stuff and its user friendly
